PROCEEDINGS OF THE PHYSIOLOGICAL SOCIETY

9–10 *November* 1984

National Hospital Meeting

DEMONSTRATIONS

Branston N.M. & Symon L. Use of a small computer for on-line measurement of regional cerebral blood flow in the rat. 2*P*

Forster A., Mills K.R., Morton H.B. & Willison R.G. On-line 'turns' analysis of the human electromyogram. 3*P*

Mills K.R. Colour topographic display of human visual evoked potentials. 4*P*

Lamb T.D. A digital tape-recorder suitable for fast physiological signals. 5*P*

Forster A., Mills K.R. & Wiles C.M. Quantitative analysis of the surface electromyogram in humans. 6*P*

Mason A.C., Millar J. & Millard C.E. The use of current-mode amplifiers for e.m.g. recordings in electrically noisy environments. 7*P*

Ladds A. Differentiation between locally generated and far-field components of the somatosensory evoked response using selective ischaemic lesions in the baboon brain. 8*P*

Dolphin A.C., Forda S.R., Gernon S., Lohmann S.M. & Walter U. Development of rat cerebellar Purkinje cells maintained in organotypic monolayer cultures. 9*P*

Bingham S. & Ward J.P.T. A simple chamber for the measurement of ionic activities in small samples. 10*P*

Chakrabarti M.K. & Whitwam J.G. Maintenance of blood gas homeostasis without respiratory movement using continuous flow ventilation in dog and cat. 11*P*

Curzon G., Dourish C.T. & Hutson P.H. Use of intracerebral dialysis of c.s.f. withdrawal for monitoring transmitter amine metabolism in relation to feeding behaviour in the rat. 12*P*

Johnson G. & Ormerod I.E.C. NMR imaging of the brain in demyelinating disease. 13*P*

Bostock H. & Grafe P. The 'threshold clamp' technique for studying impulse-dependent excitability changes in rat spinal root fibres. 13*P*

Gilliatt R.W., Jacobs J.M. & O'Neill J.H. Adaptation of compact myelin to reduced axonal calibre in the rabbit. 13*P*

Gilliatt R.W., Harding A.E., O'Neill J.H. & Reiners K. Regeneration following tibial nerve crush in the rabbit; the effect of proximal constriction. 13*P*

Galton Merle & Warrington Elizabeth A shadow image projector for the measurement of recognition thresholds for common objects viewed in three dimensions. 13*P*

Davies J.G.McF., Kirkwood P.A. & Sears T.A. The acquisition of multi-unit, multi-channel data for the study of neuronal connectivity by spike cross-correlation analysis. 13*P*

COMMUNICATIONS

Marsh S.J. Depolarization of rat vagal C-fibres and sensory neurones by capsaicin *in vitro*. 14*P*

Bostock H. & Grafe P. Inward rectification in rat and frog myelinated axons. 15*P*

Landon D.N., Love S. & Mohammed U.H.M. Quantitative analysis of the fine structure of frog nodes of Ranvier from random longitudinal sections. 16*P*

Allen T.G.J., Ikeda Hisako & Tansey E.M. An increase in axoplasmic flow precedes demyelination of optic nerve fibres in mice infected with Semliki Forest Virus. 17*P*

Patterson J.A. An *in vitro* preparation for the study of visual physiology in the squid, *Alloteuthis subulata*. 18*P*

Attwell D., Bevan S., Mobbs P., Tessier-Lavigne M. & Wilson M. Membrane currents in bipolar cells isolated from the axolotl retina, recorded by whole-cell patch-clamping. 19*P*

Lamb T.D., Matthews H.R. & Torre V. Introduction of calcium buffers into rod photoreceptors of the salamander. 20*P*

Ikeda Hisako, Priest T.D. & Robbins J. Difference in GABA and glycine actions between the retinal ganglion cells in the area centralis and peripheral retina of the cat. 21P
